

**A** hacker is targeting the Netherlands. Who is he, where does he come from and what is his target? The Intelligence services are completely in the dark. An undercover vehicle is at your disposal to track down the hacker and report his position to the S.W.A.T team. Can you track down the hacker and avoid the pitfalls he has set? The public needs your help!

*Cyber security is a theme that keeps many organizations busy, but is too often approached from the point of view of risk and fear. Risk and fear do not result in a structural improvement in the behavior of employees. The CGI HackerEscape makes the subject tangible for your employee, so that the effect of your own actions suddenly becomes clear.*

#### WHY?

Our HackerEscape is the way to get employees familiar with the various ways in which malicious parties try to retrieve information about your organization in a short time. Every step in this game leads to a direct result. Are you making the right choices? Every part of the game is aimed at giving participants insight into the modus operandi of an attacker and the choices you have as an employee to prevent the attacker from being successful.

#### WHAT?

The CGI HackerEscape is located in a utility vehicle that can easily be placed on your premises, in your parking garage or even inside your building. The experience lasts about 15 minutes and the game is played in teams of up to three people. The HackerEscape is suitable for use as a reinforcement of your existing awareness programs, but is of course also a very nice concept as an interruption of management days or company events. Our HackerEscape is always supervised by an experienced CGI security consultant, so that you can discuss the concerns of your current security posture immediately. Do you want us to tailor the scenarios for your organization? We can discuss the option with you.

#### HOW?

Interested? Then please contact us at telephone number +31 (0)88 – 564 4560 - or e-mail address [hackerescape.nl@cgi.com](mailto:hackerescape.nl@cgi.com). You can also read all the information on our website [www.hackerescape.nl](http://www.hackerescape.nl). Here you will also find videos that give more insight into our concept.

# CGI

Experience the commitment®
