

IT Asset Reporting

CGI

Experience the commitment®

Having a clean and consolidated overview of the software assets that are in use provides your organization valuable insights.

THE CHALLENGES

Very often asset data is spread over a large number of systems.

Specialized ITAM inventory scanners are needed, but hard to implement and not always secure enough. The available inventory tools do not have the functionalities to cleanse and normalize the data, leading to lots of data without valuable information.

Missing asset information causes gaps in reporting and results in a huge amount of manual work.

This all contributes to organizations not meeting compliancy standards and risking high audit costs.

THE SOLUTION

CGI offers a service that combines, reconciles, normalizes and analyses IT Asset data from multiple systems using CGI's CARE solution (CGI Asset Reporting Engine).

This solution enables CGI's ITAM experts to easily create reports and recommendations to optimize the customers Asset Management.

THE BENEFITS

- The CARE solution will adapt the customer environment. Current ITAM tooling providers require an adaption of the customer organization to their tooling.
- There is no need to roll out additional scanning / monitoring tools
- The CGI CARE solution works with all available data sources and is able to show any discrepancies in data hygiene
- Can be introduced in phases, quickly gain benefits
- Easy to adjust reports / dashboard to customer demands

IT ASSET REPORTING IN BRIEF

- Retrieve raw data
- Cleanse, normalize the data using CARE solution
- Report the dashboard with drill-down options

THE CARE SOLUTION

The CARE Solution (CGI Asset Reporting Engine) uses any possible data source that is available. The engine cleanses, reconcilises and normalizes the data. Our team of experts feed the engine to ensure it is up to date with the latest products. Via a customizable report, the asset information is presented.

This leads to reports such as:

ABOUT CGI

Founded in 1976, CGI is one of the largest IT and business consulting services firms in the world. Operating in hundreds of locations across the globe, CGI professionals help clients to achieve their goals, including becoming customer-centric digital organizations. We deliver an end-to-end portfolio of capabilities, from high-end IT and business consulting to systems integration, outsourcing services and intellectual property solutions that help accelerate clients' results.
